

# A MOUNTAIN OF RENTAL SOFTWARE EXPERIENCE

## Management Software for Golf Cart Rental Businesses

*“Genisys has made renting golf carts a breeze. I can finally keep track of my inventory with just a click of a mouse”*

- Look up inventory by: serial numbers, description, alternate description, bar code ID or unit number, product type, or category/item number
- One program handles quotes, reservations, rental contracts, returns, exchanges, Point of Sale (new or used units and parts) plus much more!
- Complete service department module including the ability to do internal, customer and warranty repairs
- Parts inventory tracking with automatic ordering function by vendor and allows for multiple warehouses and/or service trucks, each with own stocking levels
- Ability to create a purchase order for parts needed from the work order module if desired
- Pinpoint tracking of all maintenance costs and history by item
- Ability to handle partial returns and exchanges while keeping the rental contract open if desired
- Comprehensive preventative maintenance scheduling with automated reporting of required service/task
- Complete job site tracking and calculation of all customer tax areas
- Complete tracking of all meters, fuel, cleaning, and damage charges
- Tracking of original cost, selling price, maintenance costs, utilization, ROI, and much more for each piece of equipment
- System handles pick-up and delivery scheduling with dispatch functions and automated mapping ability
- Equipment checklist feature so that you can make sure it is ready to rent before going back into inventory
- Easily convert reservations and/or quotes into rental contracts
- Job site tracking is very extensive and there is a built in on screen query to see what equipment a customer has on an event site, plus this information can be automatically faxed to the customer weekly if desired
- Lost rental and sales tracking feature will allow you to fine tune your inventory based on requests that you cannot fulfill for a variety of pre-determined reasons
- Fully integrated with very comprehensive Accounts Receivable module that has built in Customer Relationship Management
- Real time 24/7 access to database from Windows Mobile based smart phones for reservations, movement of equipment, deliveries and pickups, availability, etc
